

Silk Software House

Silk Software House is a company operating internationally and specialising in the production of web and mobile applications. The internship at SSH is an excellent opportunity to gain experience by working with our team of developers and it gives you the chance to learn how to professionally carry out projects in Agile Software Development (Scrum, Crystal, DSDM).

Internship duration: 01.07-31.08.2016.

Silk Software House offers three positions at its office in Warsaw:

Mobile Developer (Android / iOS)

Required skills:

- Good knowledge of object-oriented programming
- Knowledge of Java or Objective-C
- Readiness and willingness to learn new technology
- Knowledge of Android SDK iOS SDK

Web Developer

Required skills:

- General knowledge of JS / PHP
- Knowledge of one large library / system (jQuery, angular, Wordpress, Symfony - any of the above)
- Knowledge of HTML, CSS
- Practical knowledge of databases
- Knowledge of the version control system (Git / SVN)

Junior System Administrator

Required skills:

- Knowledge of Linux and Windows basics
- Fluent use of text coating system (eg. Bash, Zsh)
- Programming skills in scripting languages (eg. Python, Perl)
- Knowledge of the theoretical foundations of computer networks and network services

Internship program:

The trainee, in cooperation with their mentor, will be involved in the designing and programming of a mobile/ web application selected in the most suitable technology or creating a test environment with the Sysadmin. We expect the trainee to participate in the project at its every stage, including planning, valuations, code review, and implementation of production.

If you are interested please send your CV to: contact@silksoftwarehouse.com

The recruitment interviews will be carried out via Skype with the CEO.
